CAPABILITY STATEMENT · UPDATED OCTOBER 2026

GCS Enterprise LLC

A minority-owned small business, founded in Texas in 2016 and led by an owner with 15 years in the oil and gas industry. We use artificial intelligence to build software, analyze data and run operations, so a small team can deliver what used to take a large one. We also supply diagnostic imaging equipment to clinical health systems.

Core competencies

AI-enabled software development

Custom web applications, data pipelines and internal tools, designed, coded and tested with AI-assisted engineering for fast delivery.

Data analytics and research

Collecting, cleaning and analyzing operational, market and public-records data, with results tested against real outcomes before decisions are made.

Business process automation

Lead tracking, follow-up, reporting and document workflows automated with AI, reducing manual workload.

Management and marketing consulting

Planning, operations and go-to-market support for small and mid-sized organizations.

Diagnostic imaging equipment

Sales of advanced mobile imaging systems (CT, fluoroscopy and digital X-ray in one unit) to clinical health systems in the US and abroad.

Differentiators

AI-native, owner-led

AI is built into how we work, which shortens timelines and lowers cost, and the owner is directly involved in every engagement.

Minority-owned small business

Supports agency and prime-contractor small-business and diversity goals.

Industrial and energy know-how

15 years in oil and gas manufacturing and pipeline services: quality standards, field schedules and large-project supply chains.

Leadership experience

Christopher P. Rohm, CEO: 15 years in the oil and gas industry.

Vallourec, 14+ years

Global manufacturer of seamless steel tubes for the energy industry: OCTG casing and tubing, premium VAM® connections and line pipe for oil and gas wells and pipelines.

Commercial Coating Services International (CCSI), 1 year

Pipeline coating services. Part of the CCSI team on the PNG LNG project in Papua New Guinea (2012), operated by ExxonMobil affiliate Esso Highlands, coating pipe joints for the gas pipeline across the Gulf of Papua.

Corporate experience

SniperLeads.io: lead generation platform

Designed, built and operate a web platform for targeted lead generation, with property and contact data, outreach tools, AI imagery and prepaid usage billing.

In-house research and analytics platform

Built a data platform that ingests live market data, scores signals and grades every prediction against what actually happened.
